WILDLAND FIRE REPORTED AT THE NEVADA NATIONAL SECURITY SITE

NORTH LAS VEGAS – At 8:40 a.m. Monday, July 27, a wildland fire began at the Nevada National Security Site (NNSS).

This is what we know to be the most current information at this time. All future information will be provided as it becomes available on the NNSS Twitter page at <https://twitter.com/NNSANevada>, Facebook at <https://www.facebook.com/NNSANevada> and the NNSS website at <http://www.nnss.gov>.

###

The NNSS and its related facilities help ensure the security of the United States and its allies by: supporting the stewardship of the nation’s nuclear deterrent; providing nuclear and radiological emergency response capabilities and training; contributing to key nonproliferation and arms control initiatives; executing national-level experiments in support of the National Laboratories; working with national security customers and other federal agencies on important national security activities; and providing long-term environmental stewardship of the NNSS’s Cold War legacy.

The NNSS is managed and operated by Mission Support and Test Services LLC (MSTS). MSTS is a limited liability company consisting of Honeywell International Inc., Jacobs Engineering Group Inc., and HII Nuclear. The NNSS falls under the jurisdiction of the National Nuclear Security Administration (NNSA), an agency within the U.S. Department of Energy. The Site’s operations are government-controlled and contractor-operated, and are overseen by NNSA’s Nevada Field Office, headquartered in North Las Vegas.

For more information on the NNSS, visit www.nnss.gov.
