4	It seems those who do not seek out information concerning the EM program and the NNSS hear or read nothing about these issues. The public needs to become knowledgeable on these issues. Best portrayed through newspapers, public meetings, etc.	3/16/2018 9:57 AM
5	I am a supporter of storing nuclear waste at Yucca Mountain. I'd recommend the NNSS provide examples to the Nevada public of other states "coming to bat" over the years regarding the storage of hazardous materials. For example, Toelle, (spelling?) Utah, Pine Bluff, Arkansas and a couple of other locations that have stored chemical and/or biological materials since WWII. Explain how technology developed after the storage started, allowing for many of these stored materials to be neutralized and are no longer a threat to the environment and people. Provide details of science research getting to the point that within a generation or two, the Nevada stored materials will be neutralized. There shouldn't be an overreaching concern of groundwater contamination in 10,000 years when the material will most likely no longer be a threat in a hundred years or so. Also, the public can be given an unclassified review of the current storage and handling of these materials. How these materials are scattered around the country in "X" number of locations. Explain the benefits of storing the material in one location (Nevada), where in my opinion, the monitoring and security will be much more effective. NNSS can promote this information to the Nevada public through annual seminars held around the state. Additionally, NNSS and Nevada state government, can provide research grants to both UNLV, UNR to conduct research into safely neutralizing radioactive material. I believe Europe, in particular France, has a jump on this research. The funding for this research can come from annual "storage" fees paid by the companies who have sent material to Yucca Mountain for storage. On one hand, I don't care for this material to be stored in "my back yard." On the other hand, to continue to allow all this material to be scattered around our country in a "willy nilly" fashion is downright frightening. Like other states have done before us since WWII, Nevada's turn at bat has come up.	3/14/2018 9:14 AM

#	RESPONSES	DATE
1	Yes. I have attended multiple workshops and meetings.	5/22/2018 10:52 AM
2	Historic yes, contemporary no. Discovery Channel documentaries and one personal experience took care of the historical part. In the early 1960s we had just parked in the Sahara Hotel parking structure and even though the engine was off, the vehicle began shaking just for a short time. We assumed it was an earthquake or aftershock learning later there had been a nuclear test about that same time.	5/3/2018 8:02 AM
3	No, just some of the historic activities.	5/1/2018 10:16 AM
4	Yes, started work at the site in 1991 and work there to 1997. I have been a subcontractor for several projects since.	4/26/2018 3:11 PM
