

FRMAC MONITORING AND SAMPLING WORKING GROUP UPDATE

2021 Goals

- 2022 will be a year of change for FRMAC Monitoring Division.
- Current Project to transition current CM tools away from Radiological Assessment Management System (RAMS) database and use the RadResponder (RR) database. Expected to be done this year.
- Need to update applicable Monitoring Division Training
 - ✓ Finish MS-250 (Field Team Supervisor Training) is the only course left. (70%)
 - ✓ Update MS-260 (CMC Training)
 - ✓ Update MS-200/400 and some operator aids regarding Digital Field Monitoring Tablets
- Need to analyze, depending on operational changes, standardizing RadResponder settings/inputs (like equipment) among CMRT and RAP assets.
