Nevada National Security Site Renovates Local Veteran's Home April 27

Repairs part of communal National Rebuilding Day

LAS VEGAS – Nevada National Security Site (NNSS) volunteers will repair and stabilize a local veteran's house in the central valley Saturday, April 27, as part of Rebuilding Together's National Rebuilding Day.

More than 40 NNSS volunteers have been involved in the labor preparation for Saturday. The needed repairs call upon many NNSS employees' areas of expertise, including electrical, landscaping and exterior structural work.

"The NNSS is proud to be a returning supporter of Rebuilding Together Southern Nevada," said Mark Martinez, president of NNSS M&O contractor MSTs. "Giving back through volunteering is one of the many ways our employees serve our community, and we're pleased to be able to provide assistance to individuals who have served our nation."

Nationally, Rebuilding Together has repaired and renovated more than 210,000 homes, non-profit facilities and community spaces through the help of more than four million volunteers between 1988 and 2018, impacting more than six million people. The organization focuses on critical home repairs in safety, accessibility and energy efficiency for community members in need.

For more information about Rebuilding Together Southern Nevada, see <https://www.rtsnv.org/>.

###

The NNSS and its related facilities help ensure the security of the United States and its allies by: supporting the stewardship of the nation's nuclear deterrent; providing nuclear and radiological emergency response capabilities and training; contributing to key nonproliferation and arms control initiatives; executing national-level experiments in support of the National Laboratories; working with national security

customers and other federal agencies on important national security activities; and providing long-term environmental stewardship of the NNSA's Cold War legacy.

The NNSA is managed and operated by Mission Support and Test Services LLC (MSTS). MSTS is a limited liability company consisting of Honeywell International Inc., Jacobs Engineering Group Inc., and HII Nuclear. The NNSA falls under the jurisdiction of the National Nuclear Security Administration (NNSA), an agency within the U.S. Department of Energy. The Site's operations are government-controlled and contractor-operated, and are overseen by NNSA's Nevada Field Office, headquartered in North Las Vegas.
